Fullstack Developer - 3 years of experience as a full time developer

Japan-based Frontend and Fullstack Developer with diverse experience from local and international companies. Passionate about technology, I bring expertise in coding, architecture, design, and business logic to contribute innovatively to your team.

MOST RECENT WORK EXPERIENCE

Software Engineer | ControlRisks

Present - Full Time | United Kingdom - Panama City, Panama Office | Risk Consultancy Company

RESPONSIBILITIES

- Continuously acquiring knowledge of new services and tools to adeptly implement them in business projects.

- Incorporate business logic requirements into project code, ensuring adherence to code standards and best practices for both new and ongoing projects.

- Refactor components to align with the best React standards, emphasizing SOLID methods and code reusability, while maintaining cleanliness and readability.

- Drive the implementation of Continuous Integration (CI) tasks for new and ongoing projects, constructing unit tests, and providing support to QA and BA teams for Frontend and backend issues.

KEY ACCOMPLISHMENTS

- Enhanced code reusability and readability by transferring code logic to custom hooks.

- Ensured flexibility in adding custom components to our library, enabling other teams to utilize them and expedite their development processes while maintaining design consistency.

Frontend Developer | Live and Invest Overseas

Full- Time | Panama City, Panama Office | Editorial Company

RESPONSIBILITIES

- Maintain website design consistency to enhance user experience and design cohesion.

- Identify and implement ideas to improve website speed and Google position

- Spearheaded the implementation of Next.js for our website and bookstore, creating demos, and providing information to the business about technology alternatives. Demonstrated how these alternatives could improve productivity and product quality.

KEY ACCOMPLISHMENTS

- Accelerated our development time and enhanced design consistency by crafting reusable components.

- Established the infrastructure for the business's transition to Next.js React.

Fullstack Developer | Freelance Project

Project | Panama City, Panama Office | Bank's Clients data management app

RESPONSIBILITIES

- Set up the project with AWS, Linux, and all the necessary tools to meet the project requirements.

- Translated client-desired features as a user into the application, leveraging the available resources and tools.

- Implemented OCR AWS to verify and ensure user data by reading their ID cards and pictures.

Frontend Developer | ConsultialT

Full Time | Spain - Panama City, Panama Office | Software Development Company - Bank App

RESPONSIBILITIES

- Constantly communicating with the backend team to address or propose ideas for the required elements in our project.

- Fix and improve the security of our API requests, data, and Forms

- Developed a design prototype for our client based on their ideas and business requirements

KEY ACCOMPLISHMENTS

- Implemented Unit tests and increased our test coverage to reach the desired %.

Software Analyst | Solusoft

Full Time | Panama City, Panama Office | Software Development Company

RESPONSIBILITIES

- Migrated our client's tech stack to Oracle Apex and adjusted the logic to align with business requirements and compatibility with Oracle.

- Developed SQL queries for reports and Oracle Apex automation.

KEY ACCOMPLISHMENTS

- Assisted by team in implementing features that were challenging or not permitted by Oracle Apex, utilizing JavaScript to align with our clients' desires.
